## EVENTS COMMITTEE

August 16, 2007

### Brainstorm Session

Today we begin creation of a beautiful, enormous garden of event ideas. A diverse garden that will nourish and delight the community as well as the gardeners. We need seeds from everyone. Some seeds may flower and bear fruit the same year, others may find companion ideas and flourish best that way, and others may take time and tending to mature.

Every seed is important. Even what some might call weed seeds.

Do not assume that any undertaking would necessarily be out of reach, nor too insignificant. In fact, try not to judge the ideas at all. Just get them out there. Even an idea that if you did think about it you might discard could spark another idea either for you or any of us.

After we do our initial brainstorm together you are likely to have more ideas. It happens. Hopefully a lot. Please write down ideas and email them to any one of the people on the Events Committee and the idea will be added to the garden. Include as much or as little detail as you like. **It is all good.**
